1. BASIS OF PRESENTATION

Western Plains Petroleum Ltd. (the "Corporation" or "Western Plains") was originally incorporated as Mises Capital Corporation under the Business Corporations Act (Alberta) on November 19, 2004 and was classified as a Tier 2 "oil and gas exploration and production" corporation under the symbol "MPP" on the TSX Venture Exchange ("TSXV") on August 11, 2006. On April 1, 2008, the Corporation changed its name to "Saha Petroleum Ltd." and began trading under the symbol "SPZ" on the TSXV on April 25, 2008. On August 24, 2009, the Corporation changed its name to "Western Plains Petroleum Ltd." and began trading under the symbol "WPP" on the TSXV on August 25, 2009.

The Corporation is based in Lloydminster, Alberta and engaged in the exploration for and the development, production and acquisition of petroleum and natural gas reserves in Western Canada.

The interim Financial Statements have been prepared following the same accounting policies and methods of computation as the annual audited Financial Statements for the year ended December 31, 2008. The interim Financial Statements should be read in conjunction with the annual audited Financial Statements and the notes thereto for the year ended December 31, 2008.

These financial statements have been prepared on a going concern basis which contemplates the realization of assets and the payment of liabilities in the ordinary course of business. Should the Corporation be unable to continue as a going concern, it may be unable to realize the carrying value of its assets and to meet its liabilities as they become due.

The Corporation's ability to continue as a going concern is dependent upon its ability to attain profitable operations and generate sufficient cash from operating and financing activities to meet the Corporation's needs. As at the period end the Corporation has a deficit of \$2.6 million and has a working capital deficiency of \$0.4 million. These financial statements do not reflect the adjustments or reclassification of assets and liabilities which would be necessary if the Corporation were unable to continue as a going concern.

2. CONTINGENT LIABILITY

The Corporation had issued a guarantee in the amount of USD\$110,000 (CAD\$127,000) as security in favor of National Hydrocarbons Agency, the Colombian oil and gas governmental agency. During the year ended December 31, 2007, the purchaser of the assets in Colombia issued a letter of credit replacing the Corporation's guarantee and therefore, the restricted cash of USD\$110,000 (CAD\$127,000) was released by the bank to the Corporation. However, the bank holding the letter of credit from the purchaser has not yet fully removed the Corporation's guarantee and therefore the Corporation's guarantee remains outstanding. It is the position of the Corporation that it is very unlikely this guarantee will result in a liability and the Corporation is taking steps to have it removed.

Subsequently, the Corporation made three acquisitions of oil properties from arm's length vendors for cash consideration totaling \$0.5 million. All properties are located in the Lloydminster area of eastern Alberta.

8. FINANCIAL RISK MANAGEMENT

(a) Overview

The Corporation has exposure to **credit risk, liquidity risk and market risk**. The board of directors of the Corporation has overall responsibility for the establishment and oversight of the Corporation's risk management framework.

(b) Credit risk

Credit risk is the risk of financial loss to the Corporation if counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Corporation's receivables. The carrying amount of financial assets represents the maximum credit exposure.

The Corporation is subject to credit risk on its receivables. The Corporation has assessed the risk of not collecting as low, since its customers are large integrated oil companies with long track records and approximately 99% of sales were made to single large integrated oil company.

(c) Liquidity risk

Liquidity risk is the risk that the Corporation will not be able to meet its financial obligations as they fall due. The Corporation's objective is to maintain sufficient liquidity to meet its liabilities when due, under normal and stressed conditions.

As at September 30, 2009, the Corporation had net debt of \$ 0.4 million (December 31, 2008 -\$2.7 million). The net debt at September 30, 2009 all relates to trade creditors. All bank debt and the note payable were retired by July 2009. The Corporation manages its liquidity risk by continuously monitoring forecasted cash flows, assessing prospects for raising additional equity, and utilizing a line of credit, when appropriate.

(d) Market risk

Market risk is the risk that changes in market prices, such as oil prices, foreign exchange rates, interest rates and equity prices will affect the Corporation's income or value of its financial instruments. The Corporation is not exposed to currency risk. The Corporation does not have any contracts in place to protect against commodity price changes

The Corporation is not subject to interest rate risk since interest bearing debt was repaid by June 30, 2009.

(e) Capital management

The Corporation's objective is to maintain access to sources of capital with which to finance its operations. The Corporation maintains a capital structure of equity. In the past it has utilized a line of credit with the Corporation's bank and a note payable. All bank debt and the note payable were retired by July 2009. The Corporation manages its capital structure and makes changes to it in light of changes in economic conditions, opportunities for accretive acquisitions and the risk characteristics of the underlying investments. The Corporation balances its overall capital structure through share issues and the use of debt as deemed appropriate in the circumstances.

(f) Fair value of financial instruments

The Corporation has determined the fair values of its financial instruments which consist of cash and cash equivalents, accounts receivable, line of credit and cheques issued in excess of cash, and accounts payable and accrued liabilities, approximate carrying amounts because of the short-term nature of these instruments, with the exception of the note payable which is classified as other liabilities, initially measured at fair value with subsequent periodic revaluations recorded at their amortized cost using the effective interest rate method.
